

# HR DATA ANALYSIS VISUALIZATION

NAME: Soundarya S

## Step 1: Upload the data

Upload the csv data file which we downloaded from the given link on the assignment.

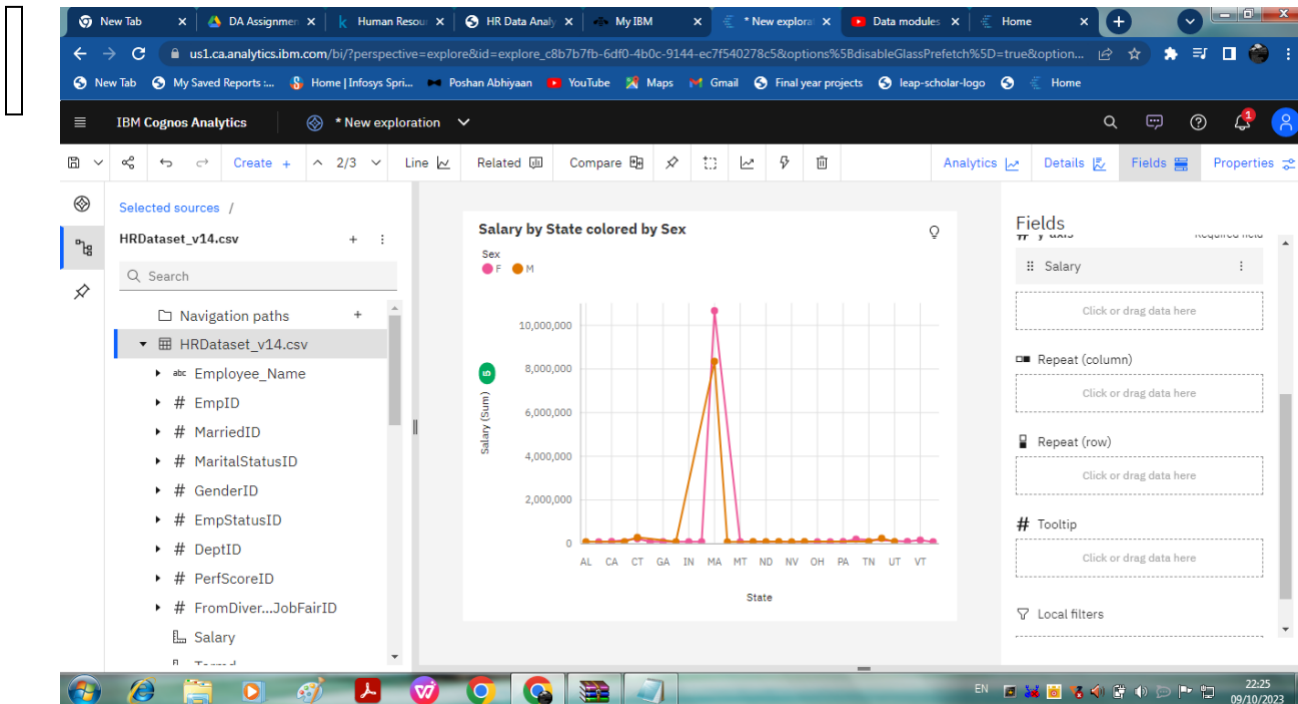

## Step 2: Prepare the Data

The screenshot shows the IBM Cognos Analytics interface. On the left, a 'Data module' pane lists columns: Row Id, Employee\_Name, EmpID, MarriedID, MaritalStatusID, GenderID, EmpStatusID, DeptID, PerfScoreID, and FromDive...bFairID. The main area displays a table with 10 rows of employee data.

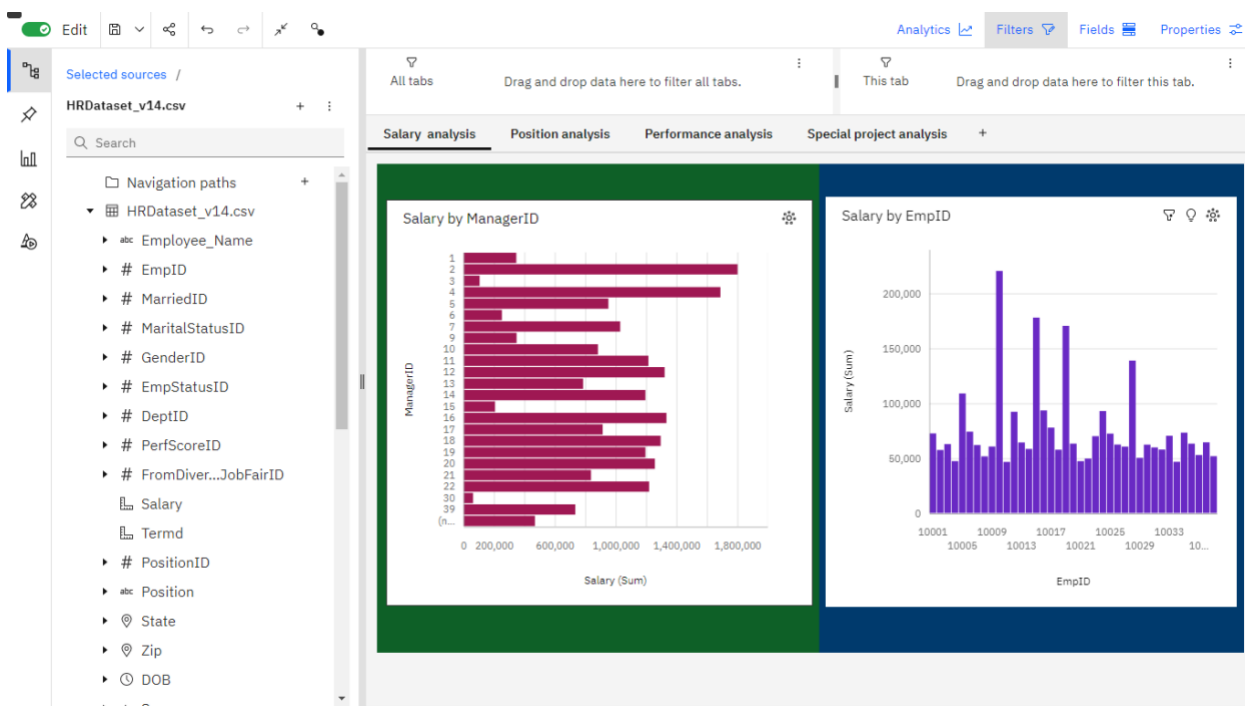

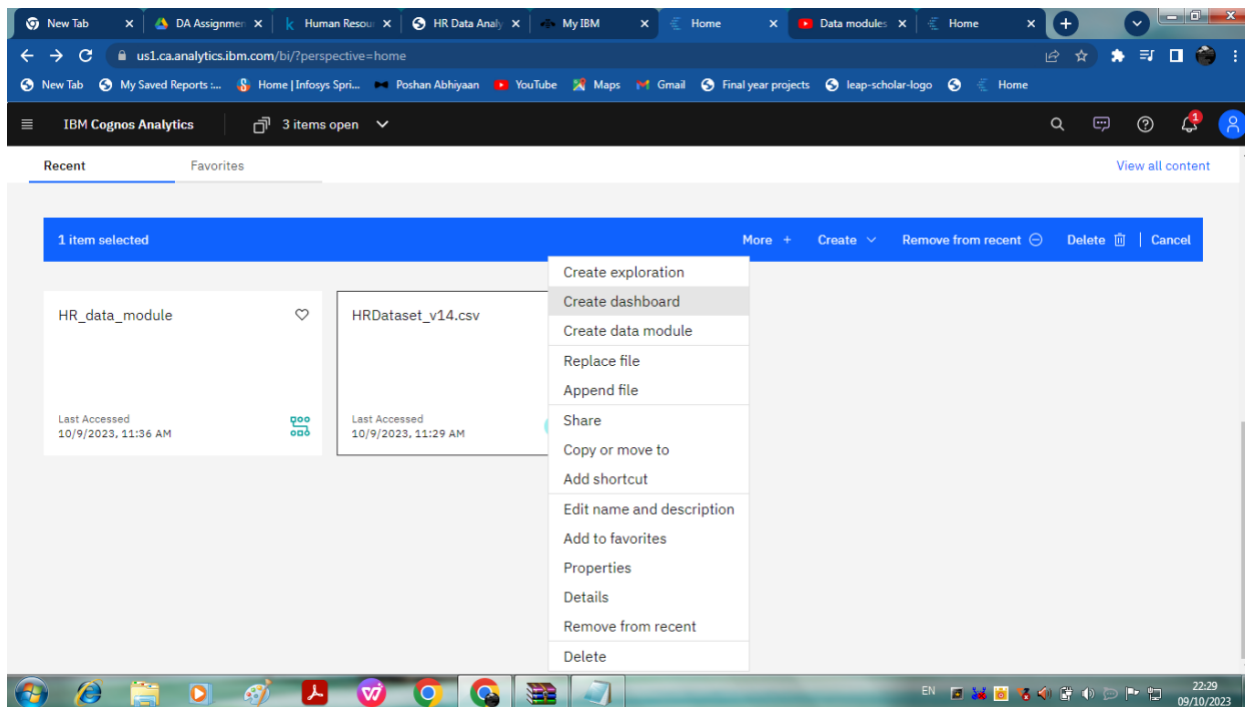

Row Id	Employee_Name	EmpID	MarriedID	MaritalStatusID	GenderID
1	Adinolfi, Wilson K	10026	0	0	1
2	Ait Sidi, Karthikeyan	10084	1	1	1
3	Akinkuolie, Sarah	10196	1	1	0
4	Alagbe, Trina	10088	1	1	0
5	Anderson, Carol	10069	0	2	0
6	Anderson, Linda	10002	0	0	0
7	Andreola, Colby	10194	0	0	0
8	Athwal, Sam	10062	0	4	1
9	Bachiochi, Linda	10114	0	0	0
10	Bassett, Alexander	10050	0	2	1

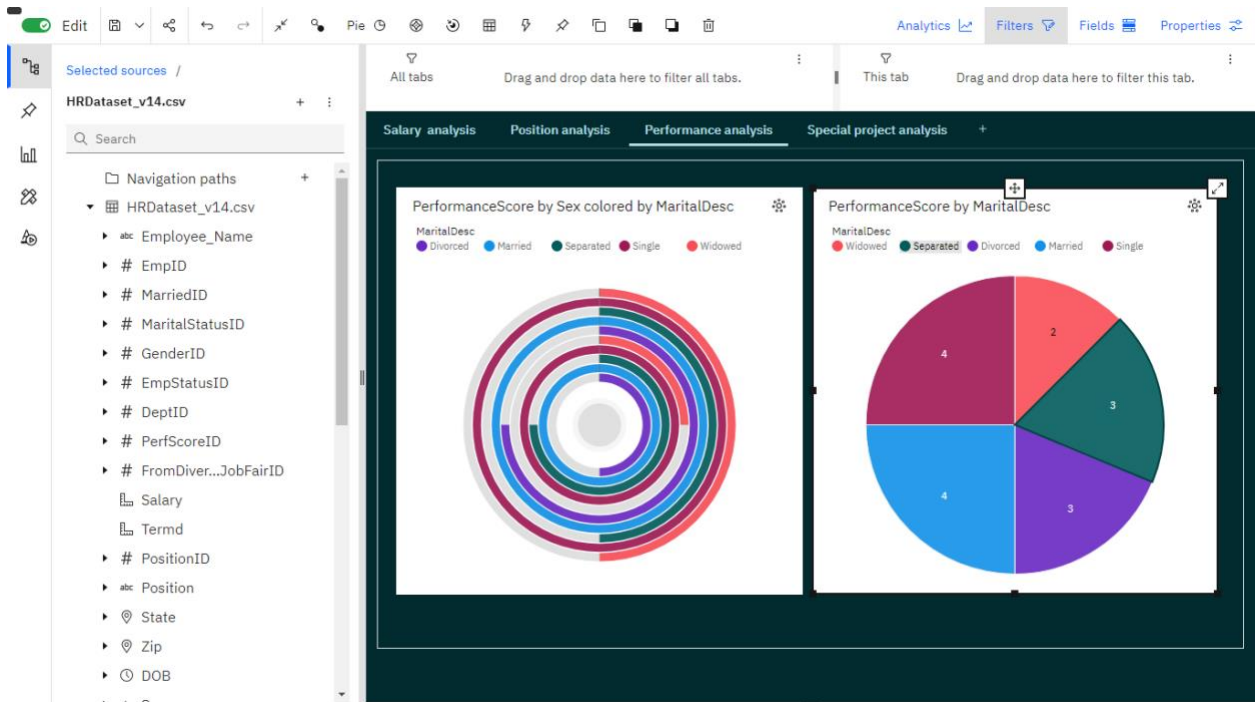

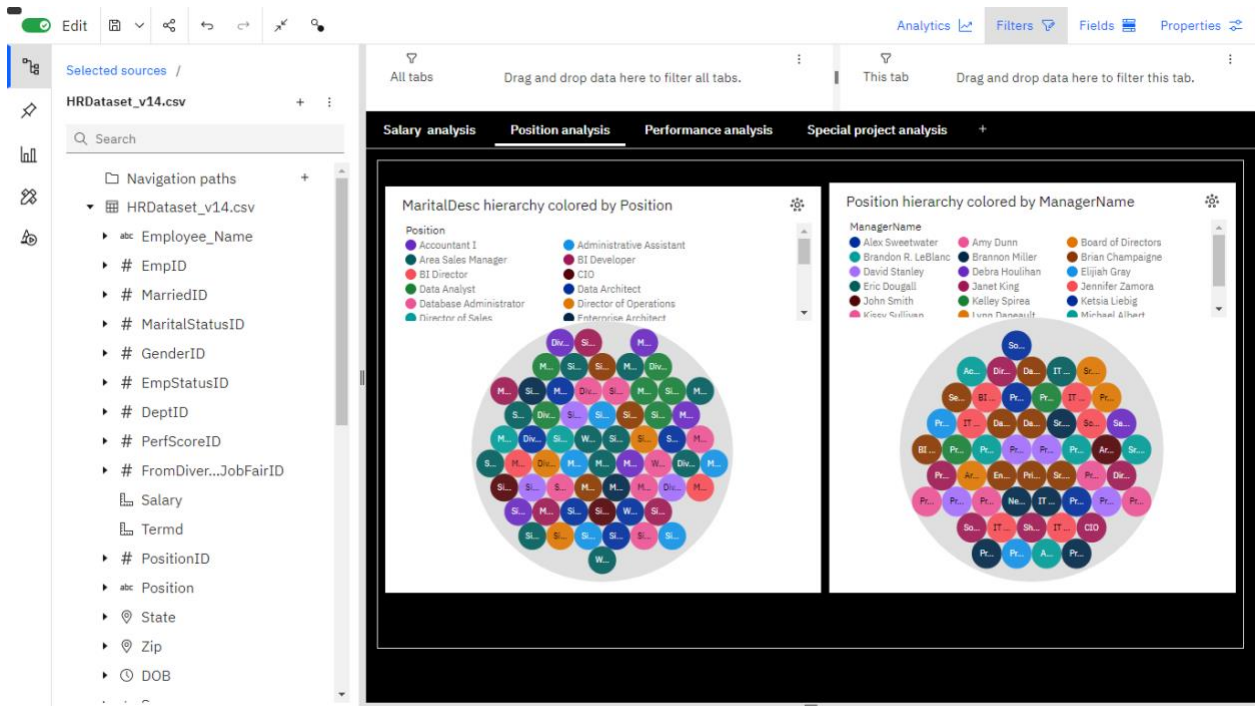

Remove the unnecessary columns and check for the missing values. In my case, there is no missing case. After removing, save the new data module in a required name.

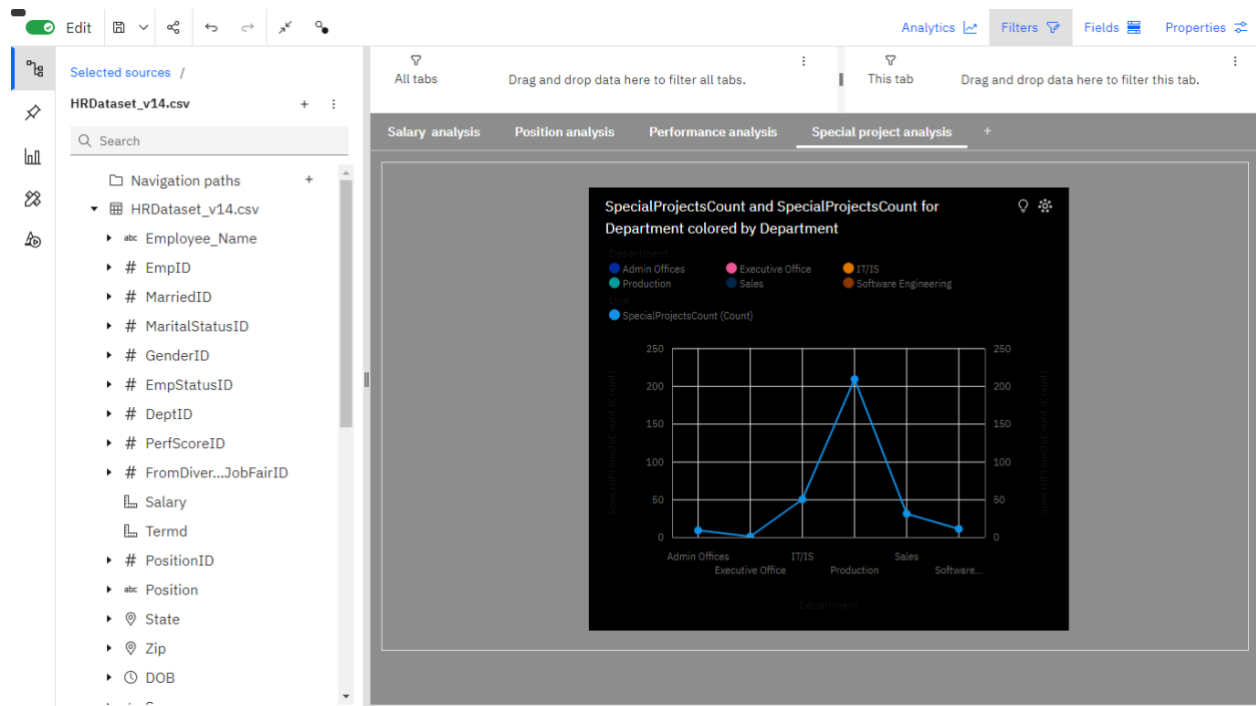

### Step 3: Exploring the Data

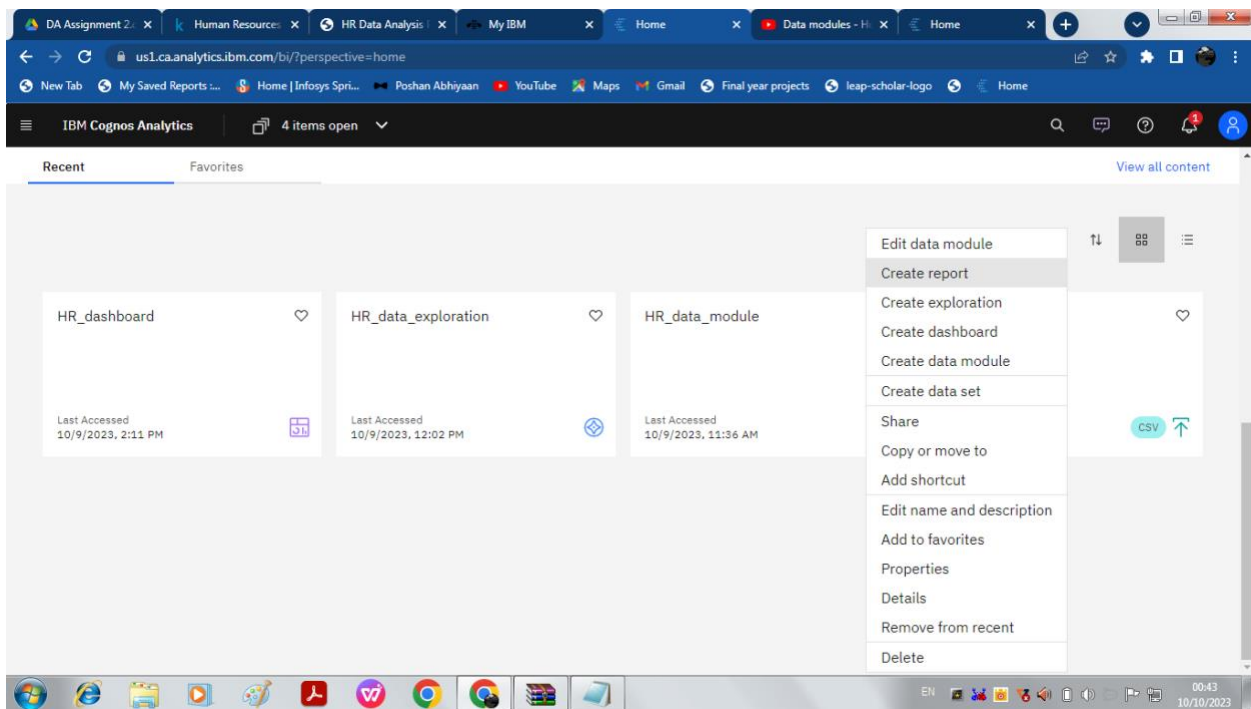

## Step 4: Create Interactive Dashboard

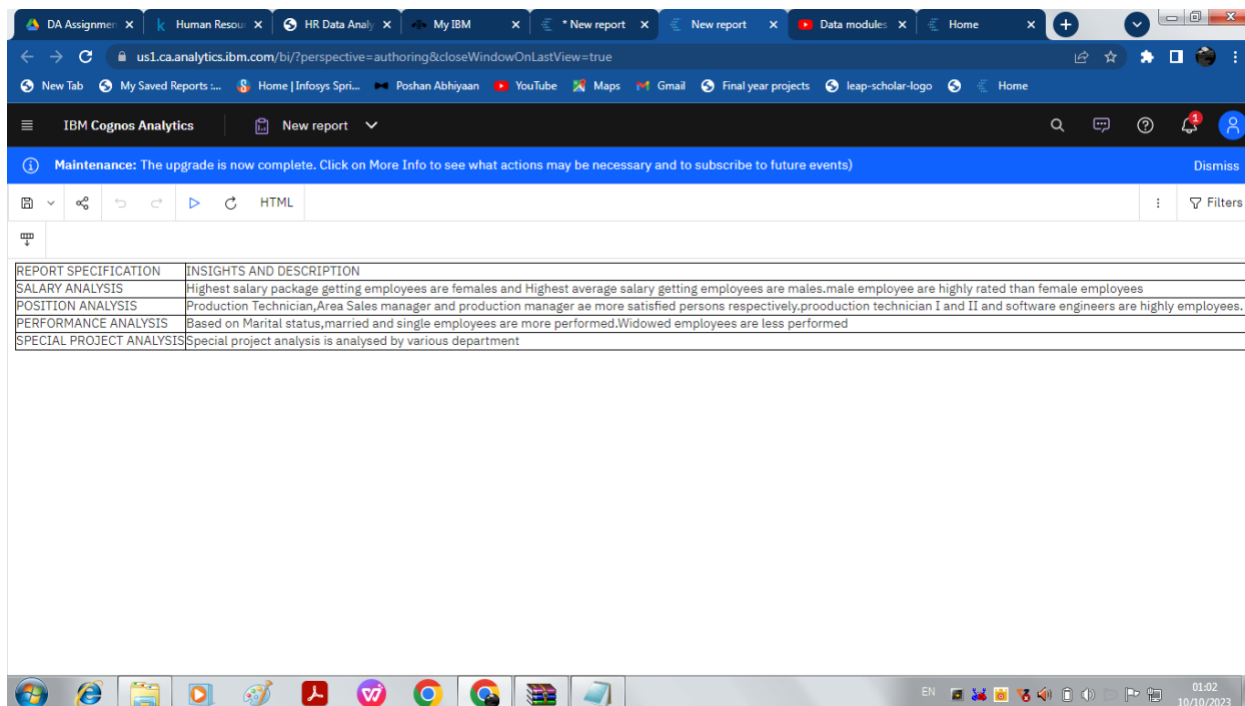

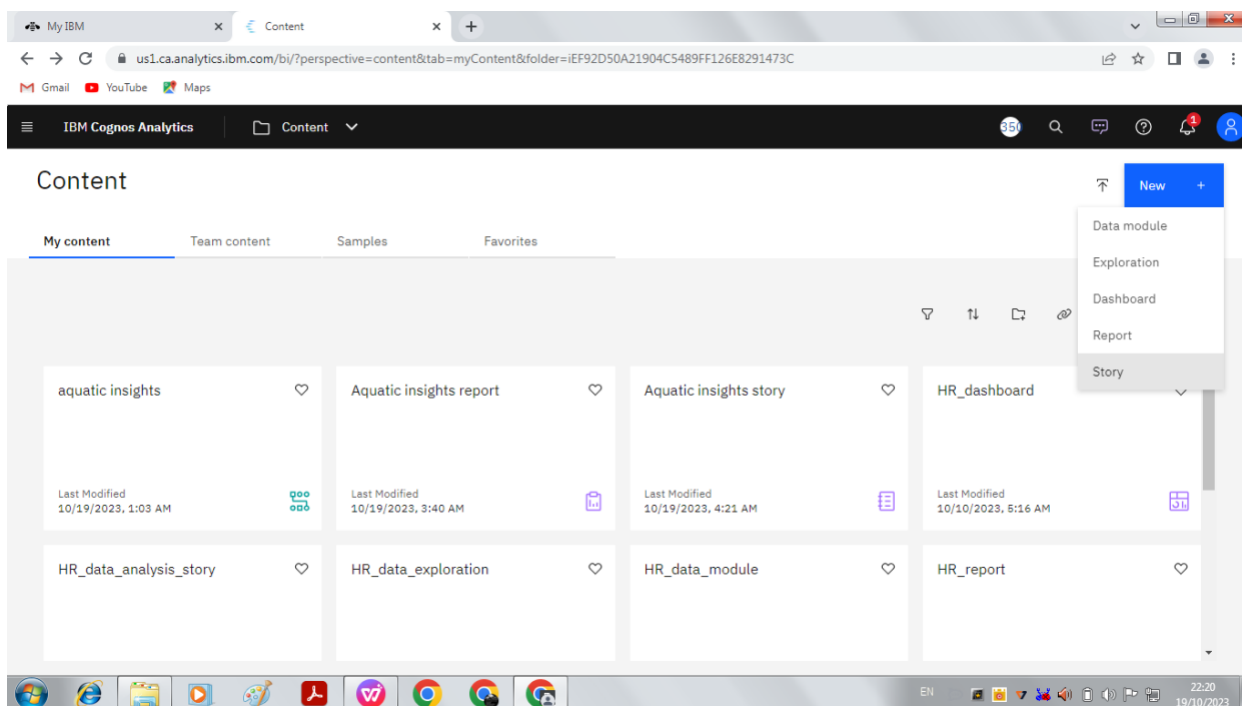

## Step 5: Creating Report

## Step 6: Creating Story

Here is the Completed story

IBM Cognos Analytics | \* HR\_story\_dashboard

## Position Analysis

MaritalDesc hierarchy colored by Position

- Position by marital desc" doesn't appear to be a standard term in HR or organizational data. However, it seems to suggest a hypothetical scenario where employee positions or job roles are categorized or analyzed based on their marital status descriptions.
- Analyzing data by manager name can provide insights into how well different managers are overseeing their teams, identifying potential bottlenecks in the organization's hierarchy, or assessing the performance of individual managers.

Position hierarchy colored by ManagerName

Prev scene | Next scene | Scene 3 of 4 | 0:04.0 | 0:05.0

IBM Cognos Analytics | \* HR\_story\_dashboard

## Performance Analysis

PerformanceScore by Sex colored by MaritalDesc

- It's important to approach this analysis carefully to ensure that gender-based discrimination or bias is not perpetuated.
- Analyzing performance by marital status involves assessing whether employees with different marital statuses (e.g., single, married, divorced) exhibit variations in their job performance.

PerformanceScore by MaritalDesc

Prev scene | Next scene | Scene 4 of 4 | 0:05.0 | 0:05.0

Save story as per required name .Finally make sure everything has been saved.
